

## **CabVista: How can I send a job to a driver ?**

---

There are some possible ways to dispatch a job from CabVista:

### **1) Email:**

---

Some of our customers use CabVista to email the jobs to their drivers (who might, for example, all have Blackberrys)

### **2) Text messaging:**

---

We don't dispatch via text messages as such but there are quite a few services that you can join, that convert an email to a text message for you, so you could then use CabVista's emailing feature to send a text message.

Here are some examples:

[http://www.totext.net/products/email\\_to\\_text.html](http://www.totext.net/products/email_to_text.html) or <http://www.fastsms.co.uk/>

### **3) Other methods:**

---

Or of course, you can use any existing manual method (example: radio).

## **Further Questions & Answers:**

a) Can I also send a confirmation of the job to the Customer ?

Yes - using any of the same methods as listed above.

b) Can I email a whole day's jobs to a driver in one go ?

Yes - you can, for example, email all of tomorrow's jobs to a driver.

Or you can email the jobs individually as they are booked or dispatched.
